SKILLS

JavaScript, React / Redux, Ruby on Rails, SQL, jQuery, HTML, CSS, Git, Jasmine

EXPERIENCE

Software Consultant, Solution Street

Herndon, VA - September 2017 — Present

- Develop enterprise resource planning (ERP) software designed for large scale project-based companies using a proprietary framework built on top of JavaScript and CanJS
- Populate UI component data and perform CRUD actions using asynchronous RESTful API calls
- Implement client side unit tests using Jasmine
- Interact with relational databases by running SQL queries in Microsoft SSMS
- Debug and fix issues on the Visual Basic .NET server side
- Handle customer support cases as they arise
- Ensure code quality and adherence to best practices by reviewing other developers' pull requests
- Assist junior developers and help get them acquainted with the framework
- Fix bugs on a repair and returns app built in Ruby on Rails
- Conduct technical interviews for prospective Solution Street employees

Front End Developer, LCG Inc.

Bethesda, MD - July 2017 — September 2017

- Improved UX and styling on a content migration project using HTML and CSS
- Ensured that the correct content was displayed across all nodes by working with Drupal CMS

Software Developer, Language in Motion

New York, NY - May 2017 — June 2017

- Developed application to match language tutors with students based on interests and skill level
- Added features, fixed bugs, and worked on styling using React/Redux, Ruby on Rails, and CSS/Sass

Production Manager / Sound Engineer, The Hit Men

USA and Canada - February 2012 — October 2016

- Worked with technical directors and backline providers to produce concerts at venues across the United States and Canada
 - Produced live sound and visual components, coordinated merchandise sales
-
