SKILLS

JavaScript, Ruby on Rails, SQL, React, Redux, jQuery, Lodash, HTML/CSS, Sass, Git, Jasmine

EXPERIENCE

Solution Street, Herndon, VA - *Software Consultant*

SEPTEMBER 2017 - PRESENT

- Develop enterprise resource planning (ERP) software designed for large scale project based companies
- Upgrade existing desktop architecture to a cloud based web app using a proprietary framework built on top of JavaScript and CanJS
- Use asynchronous RESTful API calls to populate UI components and perform other CRUD actions
- Write client side unit tests using Jasmine
- Handle customer support cases as they arise
- Run SQL queries in Microsoft SSMS to interact with relational databases
- Conduct code reviews across many areas of the application
- Occasionally debug the Visual Basic .NET server side
- Conduct technical interviews for prospective employees

LCG Inc., Bethesda, MD - *Front-End Developer*

JULY 2017 - SEPTEMBER 2017

- Used HTML and CSS to improve UX/styling on a content migration project for the National Institute of Biomedical Imaging and Bioengineering (NIBIB)
- Worked with Drupal CMS to ensure that the correct content is displayed across all nodes
- Cleaned legacy HTML and CSS code according to best practices

Language in Motion, New York, NY - *Software Developer*

MAY 2017 - JUNE 2017

- Developed application to match language tutors with students based on interests and skill level
- Worked on the React/Redux front end and Ruby/Rails back end adding features, fixing bugs, and styling
